📱 App Tabs & Navigation Guide

TAB	KEY CONTROLS	DESCRIPTION & FUNCTION
Court	+ Point, Undo, Swap	Live Match Scoring: Tap team score to add points. Quick undo button reverts points. Swap button flips court sides & LED colors.
Big Screen	Fullscreen View	Spectator Display: Opens clean high-contrast scoreboard for audience phones, court-side tablets, or club TV monitors.
Rules	Golden Point, Sets	Match Rules Configuration: Toggle Golden Point (No-Ad) vs Deuce, best of 1 / 3 / 5 sets, 6-game sets, and tiebreak (7 or 10 pts).
Counter	Timers & Stopwatch	Gym & Fitness Modes: Run Single Count-Up / Countdown timer or Dual independent clocks with customizable round intervals.
Clock	Sync Phone Time	Real-Time Clock Sync: One-tap button pushes phone's exact time to scoreboard hardware DS3231 RTC. Customize clock LED color.
Display	Brightness & Sleep	Hardware Power & LEDs: Adjust panel brightness (0–100%), set idle sleep timeout (5–30 min), or enable Night Mode palette.
Info	Diagnostics & MAC	Status & Diagnostics: View battery voltage, paired remote MAC, Bluetooth signal strength, and firmware version.

🌐 Browser & OS Compatibility

- **Android / Windows / Mac:** Use **Google Chrome** or **Microsoft Edge**. Web Bluetooth works out-of-the-box without extra apps.
- **iPhone & iPad (iOS):** Apple Safari blocks Web Bluetooth. Install the free **Bluefy** or **WebBLE** browser app from the App Store.
- **Offline Ready (PWA):** The app caches automatically. It opens and works at the court even without an active internet connection.

🔗 Seamless Ecosystem Sync

- **Master Rules Engine:** The ESP32 scoreboard serves as the single source of truth. Phone, physical clicker, and smartwatch stay 100% in sync.
- **Instant Multi-Device Feedback:** A point clicked on the physical Bluetooth remote updates the web app and watch in milliseconds.
- **Remote MAC Management:** Paired Xiaomi clicker MAC is viewable and configurable under the *Info* tab.
